

Project Details for Hemlock Treatment Project Tallulah River Campground HCA # 37

Date:	Sunday, November 6, 2022	
Event:	Service event to conduct treatment of hemlocks at Tallulah River Campground in Rabun County north from intersection of Hwy 76 and Persimmon Rd.	
Notice:	<p>As SGH is committed to protecting the health and safety of our volunteers at all events, we will be following CDC guidelines regarding the <i>coronavirus</i> pandemic.</p> <p>> If you have, or recently have had, a fever or any other symptoms of COVID-19, please do not sign-up and do seek appropriate medical help.</p> <p>> Face coverings will not be required but will be available for those wishing to wear them.</p>	
Where to Meet:	<p>We'll meet at the Tallulah River Campground entrance. At the intersection of Hwy 76 and Persimmon Rd go north on Persimmon Rd approx. 4.2 miles. Turn left on Tallulah River Road (aka FS70) and drive 1.3 miles to campground on your left. Paved road all the way. We will meet at the entrance at an unoccupied campsite. Park so that you don't block the road for people camping. There is a big Forest Service Sign at the entrance. See driving directions and maps following. Please be on time.</p>	
Schedule:	<p>9:00 a.m. – All SGH volunteers report. We will meet at the Campground entrance. 9:15 a.m. – Volunteers will receive a briefing on the condition of the hemlocks, treatment process to be used, and safety reminders. You will be organized into small teams including one experienced SGH Facilitator per team, receive your equipment and supplies, be directed to your treatment site, and begin treating trees. NLT 1:00 p.m. – We should be finished. We will clean equipment and depart for home.</p>	
Terrain:	<p>The terrain in the campground is creek bottom. Undergrowth is clear to moderate. We'll make sure everyone is assigned to a work site or job assignment where they can be safe and comfortable.</p>	
What to Wear:	<p>Dress for the weather and the activity, including long pants and long sleeves, gloves and sturdy footgear, and rain gear in case of light rain. Nitrile gloves will be provided for those who will be handling chemicals. Work gloves and boots strongly recommended.</p>	
What to Bring:	<p>Pack a sack lunch and bring it with you. Bring a personal water bottle and a camera if you like. A small day pack may come in handy. We'll provide some snacks and extra bottled water. If you have any serious allergies (like bee stings), bring whatever you need to manage the situation.</p>	
Don't Bring:	<p>This is an environmentally friendly, pack-it-in pack-it-out event, so please don't bring any glass or Styrofoam items. Also, as much as we love dogs, please don't bring them this time.</p>	
Registration:	<p>Participants must sign up in advance by Jon Jones at jdjones611@gmail.com or 910-987-0306. If you have questions, please call or email before project date.</p>
