Save Georgia's Hemlocks

Instructions for Completing the SGH Caution Sign

Product Name: The name shown on the product package, such as Criterion 75 WSP, Dominion 2L, or Safari 20 SG

E.P.A. Reg. #: A number assigned by the Environmental Protection Agency. It is found on the front of the product label.

Method: Soil injection, soil drench, trunk spray, foliar spray, or tablet

Purpose of application: Control of hemlock woolly adelgid

Date of application: Today's date

Place a paper copy of the sign at the entrance(s) to the treatment area at the beginning of the project.

Remove it at the end of the project or the end of the re-entry interval, which is later. For soil injection or tablet placement, re-entry time can be immediate since the treatment material is underground. For soil drench, trunk spray, or foliar spray, re-entry time can be as soon as the treatment material is dry, usually an hour or two after application.
